

# HUMLEGÅRDEN

The area Apelsinen became more energy-efficient after upgrading to 1042 (959 m<sup>2</sup>) ConverLight<sup>®</sup> Static windows from ChromoGenics

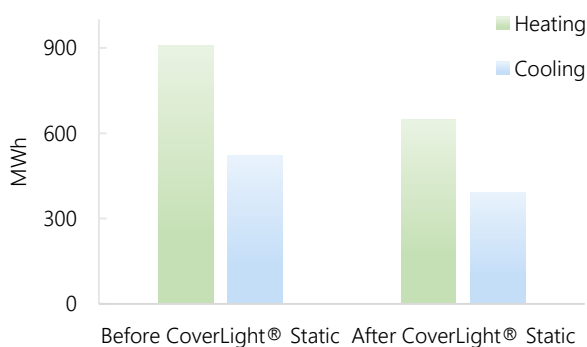

## Background

In order to keep energy costs down and improve the indoor climate, Humlegården replaced previously installed 2-glass windows to ConverLight<sup>®</sup> Static.

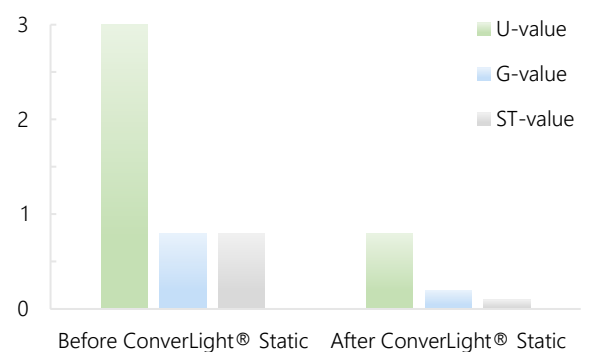

*"Humlegården always strives to buy the most sustainable and environmentally friendly products on the market. Therefore, we chose to upgrade to ConverLight<sup>®</sup> Static"*  
– Tom Eriksson, Technical coordinator at Humlegården

## Lowered energy costs

*"Our tenants experience the upgrade positively and we do not need any external sun protection"*  
– Tom Eriksson, Technical coordinator at Humlegården

## Improved indoor climate

## Reduced environmental impact

↪ In 2015, the property's emission of CO<sub>2</sub> were reduced by 39 tonnes solely through the installation of ConverLight<sup>®</sup> Static.
